## 3702 Classic Wall Primer (Int & Ext)

### Tara Paint CLASSIC WALL PRIMER

Tara Paint CLASSIC WALL PRIMER is water based wall coating suitable for application on interior as an undercoat to distemper and emulsion paints.

### PRODUCT BENEFIT

- Easy brushing.
- Excellent covering.
- Alkali resistance.
- Quick drying and good sealing properties.
- It specially containing with fungicides

### PRODUCT FEATURE

Shelf Life	3 year from date of manufacturing in original tightly closed containers away from direct sunlight and excess heat.
Colour available	White undercoat
Coverage	On smooth masonry surface by brushing 215-270 sq./ltr
Drying time to Touch	20 min
Recommended Usages	It can be used for priming plastered walls, asbestos, brick work, concretes etc.

### How to Apply

**PLASTER** New Masonry Surface must be allowed to cure completely. It is recommended to allow 28 days as the curing time for new masonry surfaces.

**CLEANING:** - Surface should be free from all dirt, loosely held plaster, Powdery residue, oil, grease or any other any loose paint dust or grease or any other contamination. Any previous growth of fungus, algae, or moss needs to be removed thoroughly by vigorous wire brushing and cleaning with water. One coat of biocidal solution is recommended to prevent further growth of algae, fungus, or moss.

**REPARING:** -The Substrates must be checked for its soundness using small hammers. All cracks at corner joints, channels and parapets should be properly treated.

All the information given here are as per the results obtained in laboratory & are given in good faith to guide the user but without any warranty, the actual application results might vary depending on the conditions. We are not responsible for any loss, injury or damage resulting from the use of this information
